O firmi

Firma UKRAS DOO iz Velikog Popovića osnovana je daleke 1970. godine i u početku je bila porodična radionica koja je izrađivala stolariju i građevinske lajsne. Danas Ukras ima preko 4500 m² proizvodnog i magacinskog prostora. Stalnim ulaganjem u mašine i opremu danas posedujemo liniju za lakiranje profila sa UV lakovima, najnoviju komoru za suvo farbanje uz pomoć robota, najsavremeniju opremu za CNC obradu drveta i sklapanje vrata. Više linija za profilisanje i oblaganje profila.

Fabrika UKRAS u Velikom Popoviću, snimak iz vazduha.

Proizvodnja od 1970. u Velikom Popoviću, opština Despotovac.

Proizvodni program

Lajsne za uramljivanje slika

Proizvodnja lajsni za uramljivanje slika u preko 300 različitih tipova. Lajsne se rade od uvoznog drveta abahi (samba, ajus, wawa) iz Gane (Afrika). Samba se uvozi kao daska u suvom stanju i kao takva prolazi kompletan proizvodni proces primarne prerade drveta, profilisanje u odgovarajući profil, primarnog farbanja i završnog farbanja (nanošenje farbe na nitro, poliuretanskoj ili UV osnovi na liniji za farbanje), tzv. pozlate (što je zapravo nanošenje različitih vrsta dekorisanih folija na odgovarajući profil koji je hemijski tretiran, toplo nanošenje folija bez lepka). Postoje i neki specijalni proizvodni procesi kao što je oblaganje profila aluminijumom ili nanošenje specijalne paste preko dekorisanog valjka na prethodno hemijski tretiranu lajsnu da bi se dobili odgovarajući ukrasi na lajsni. Kompletan proizvodni proces se radi uz pomoć mašina, a većim delom je automatizovan.

Lajsne za laminatne podove

Proizvodnja lajsni za laminatne podove. Lajsne se rade u deset profila i preko 30 različitih dekora. Prvo se table MDF-a prorezuju na odgovarajuću širinu, a zatim profilišu na četvorostranim mašinama, nakon toga na specijalnim mašinama za oblaganje profila i uz pomoć lepka na temperaturi od 200 stepeni oblažu se odgovarajući profili lajsni melaminskom folijom u tridesetak različitih dekora (bukva, hrast, bavarski hrast, trešnja, orah, javor, jasen, itd).

Drvene parket lajsne

Proizvodnja drvenih parket lajsni. Parket lajsne se izrađuju od drveta smrče sa izbačenim greškama drveta i furnirane prirodnim furnirom u preko 60 drvnih dekora i četiri profila koji prate najsavremeniji dizajn parketa. Završnim lakiranjem sa UV lakovima ispoštovani su svi najsavremeniji zahtevi i kompletno je zaokružen proizvodni proces u proizvodnji parket lajsni. U ovaj program spadaju i podne završne, prelazne i prelazno-završne lajsne kao prateći ali nezaobilazni program lajsni koji je neophodan kod pravilnog postavljanja parketa.

Zidne obloge

Proizvodnja zidnih obloga, sa svim pratećim završnim lajsnama. Ovaj deo proizvodnje firma Ukras radi već devetnaest godina.

Drvene garnišne

Proizvodnja drvenih garnišni, garnišne se rade po meri kupca do pet metara iz jednog dela, maska se radi od drveta wawa, a nosač je aluminijumski sa dva ili tri kanala.

Lajsne za kuhinje i plakare

Proizvodnja lajsni za kuhinje i plakare. Postoji pet profila lajsni koji su obloženi sa melaminskom folijom u šest-sedam različitih dekora. Veoma interesantan program za industriju nameštaja jer je firma Ukras u mogućnosti da odradi bilo koji profil na zahtev kupca ali uz odgovarajuću poručenu metražu. Takođe sklapamo frontove za nameštaj po meri kupca.

Unutrašnja vrata

Proizvodnja unutrašnjih vrata. Ovaj program se obavlja na najsavremenijim mašinama i sve proizvodne operacije se obavljaju mašinskim putem. Vrata se rade u kombinaciji MDF-drvo-MDF sa L-pervajzima koji se obostrano podešavaju. Program sadrži proizvodnju belih unutrašnjih vrata sa velikim izborom kanalura, furniranih vrata sa furnirom hrasta, bukve, trešnje i oraha. Vrata se rade i po specijalnim zahtevima kupaca tako da su mogućnosti neograničene.
